

CAPABILITY — EVIDENCE & ACCOUNTABILITY

Field Evidence & Accountability

ARGUS turns the advance checklist into a capture engine: the operator confirms each item with their own eyes and leaves behind a defensible, attributed record.

Pre-affirmed, then confirmed by eye

For each stop, ARGUS pre-affirms the advance items it expects. The operator works the list on the ground and confirms — or flags — each item, so the record reflects what was actually seen, not just what was assumed.

Three ways to capture proof, per item

- › **Street-View still** — freeze the exact framing the operator is looking at as an immutable, timestamped image: proof of what was checked, from where.
- › **Photo** — upload from the device or camera.
- › **Voice or typed note** — speak or type an observation and attach it to the item.

Never lose progress

Every confirmation, note, and capture autosaves continuously — it is power-loss safe, and work reopens exactly where it was left. Seconds spent re-doing surfaced detail are seconds a team cannot afford.

Evidence flows into the reports

Confirmed and flagged items, notes, and evidence thumbnails surface into the **Brief** and the after-action **Debrief** — so the field verification is part of the deliverable the team reads and hands off, not a separate pile of photos.

Governance and attribution — by design

ARGUS is built so that a team lead governs the record: proposed changes flow up for **approve, deny, or waive**, and every action is attributed to who did it and when in an append-only trip ledger. Routine field evidence logs automatically; changes to the plan require the lead. The result is chain-of-custody by design — attributed, timestamped, and nothing changed anonymously. Multi-operator collaboration is rolling out on this foundation.

Informational use only. Analysis is machine-generated from publicly available and open-source information and must be verified before operational use. ARGUS is not a substitute for licensed security, legal, or medical professionals, or for emergency services — in any emergency, call 911.
